INTERNATIONAL SEARCH REPORT

PCT/US2005/001310

A. CLASSIFICATION OF SUBJECT MATTER IPC 7 C01B31/02				
	o International Patent Classification (IPC) or to both national classif	fication and IPC		
	SEARCHED ocumentation searched (classification system followed by classification system followed by classif	ation symbols)		
IPC 7	C01B	, ,		
Documentat	tion searched other than minimum documentation to the extent tha	I such documents are included in the fields so	earched	
Electronic d	ata base consulted during the international search (name of data	base and, where practical, search terms used)	
EPO-In	ternal, COMPENDEX			
C. DOCUM	ENTS CONSIDERED TO BE RELEVANT	·		
Category *	Citation of document, with indication, where appropriate, of the	relevant passages	Relevant to daim No.	
P,X	KHABASHESKU V N ET AL: "Functic carbon nanotubes and nanodiamone engineering and biomedical application of the property of the	ds for ications" ELSEVIER NL,	1-20	
X Furt	ther documents are listed in the continuation of box C.	Patent family members are listed	in annex.	
A document defining the general state of the art which is not considered to be of particular relevance *E* earlier document but published on or after the international filling date *L* document which may throw doubts on priority claim(s) or which is clied to establish the publication date of another citation or other special reason (as specified) *O* document referring to an oral disclosure, use, exhibition or other means *P* document published prior to the international filing date but		"T" later document published after the international filing date or priority date and not in conflict with the application but cited to understand the principle or theory underlying the invention "X" document of particular relevance; the claimed invention cannot be considered novel or cannot be considered to involve an inventive step when the document is taken atone "Y" document of particular relevance; the claimed invention cannot be considered to involve an inventive step when the document is combined with one or more other such documents, such combination being obvious to a person skilled in the art. "&" document member of the same patent family		
Date of the	actual completion of the international search	Date of mailing of the international sea	arch report	
1	.0 June 2005	24/06/2005	24/06/2005	
Name and mailing address of the ISA European Patent Office, P.B. 5818 Patentlaan 2 NL - 2280 HV Rijswijk Tel. (+31-70) 340-2040, Tx. 31 651 epo nl, Fax: (+31-70) 340-3016		Authorized officer Marucci, A		

INTERNATION & SEARCH REPORT

i. In hal Application No PCT/US2005/001310

Continuation) DOCUMENTS CONSIDERED TO BE RELEVANT	
egory * Citation of document, with indication, where appropriate, of the relevant passages	Relevant to claim No.
STEVENS J L ET AL: "Sidewall amino-functionalization of single-walled carbon nanotubes through fluorination and subsequent reactions with terminal diamines" NANO LETTERS, ACS, WASHINGTON, DC, US, vol. 3, no. 3, 28 January 2003 (2003-01-28), pages 331-336, XP002314112 ISSN: 1530-6984 "Scheme 1" page 335, column 2, line 4 - line 8	1-9
PENG HAIQING ET AL: "Sidewall Carboxylic Acid Functionalization of Single-Walled Carbon Nanotubes" J. AM. CHEM. SOC.; JOURNAL OF THE AMERICAN CHEMICAL SOCIETY DEC 10 2003, vol. 125, no. 49, 10 December 2003 (2003-12-10), pages 15174-15182, XP002331483 "Scheme 1"; "Conclusion" column 2	10-20
GEORGAKILAS V ET AL: "AMINO ACID FUNCTIONALISATION OF WATER SOLUBLE CARBON NANOTUBES" CHEMICAL COMMUNICATIONS - CHEMCOM, ROYAL SOCIETY OF CHEMISTRY, GB, 14 November 2002 (2002-11-14), pages 3050-3051, XP002265590 ISSN: 1359-7345 the whole document	1-20

INTERNATIONAL SEARCH REPORT

International application No. PCT/US2005/001310

Box II Observations where certain claims were found unsearchable (Continuation of Item 2 of first sheet)
This International Search Report has not been established in respect of certain claims under Article 17(2)(a) for the following reasons:
Claims Nos.: because they relate to subject matter not required to be searched by this Authority, namely:
Claims Nos.: because they relate to parts of the International Application that do not comply with the prescribed requirements to such an extent that no meaningful International Search can be carried out, specifically:
3. Claims Nos.: because they are dependent claims and are not drafted in accordance with the second and third sentences of Rule 6.4(a).
Box III Observations where unity of invention is lacking (Continuation of item 3 of first sheet)
This International Searching Authority found multiple inventions in this international application, as follows:
see additional sheet
As all required additional search fees were timely paid by the applicant, this International Search Report covers all searchable claims.
2. X As all searchable claims could be searched without effort justifying an additional fee, this Authority did not Invite payment of any additional fee.
3. As only some of the required additional search fees were timely paid by the applicant, this International Search Report covers only those claims for which fees were paid, specifically claims Nos.:
4. No required additional search fees were timely paid by the applicant, Consequently, this International Search Report is restricted to the invention first mentioned in the claims; it is covered by claims Nos.:
Remark on Protest The additional search fees were accompanied by the applicant's protest. No protest accompanied the payment of additional search fees.

FURTHER INFORMATION CONTINUED FROM PCT/ISA/ 210

This International Searching Authority found multiple (groups of) inventions in this international application, as follows:

1. claims: 1-9

TREATURE .

Carbon nanotubes functionalised with amino acid through a bond C (of the nanotube)— N (of the amino acid). Preparation thereof by reacting fluorinated carbon nanotubes with an ester of an amino acid and then hydrolizing.

2. claims: 10-20

Carbon nanotubes functionalised with amino acids through a C (of the nanotube)— C (of the amino acid) bond. Preparation thereof involving a reaction of the nanotubes with a peroxide species, Br2 and NH3.
